I searched the microsoft website but I didn't find it. But its better to upgrade your existing RDC version. In that way you will not face any problems of missing apps. Ritupam Banerjee Ritupam Banerjee is a Microsoft Certified IT Professional. Ritupam Banerjee started life as a technical support engineer at HCL Technologies. Ritupam Banerjee Joined Techy_Devy to pursue his MSD. Ritupam Banerjee currently works at Intel. He enjoys authoring articles in his free time. He is not blogging right now. This article was originally published at == RD Client (RDC) 7.0 is available for download here. Read the Release Notes carefully as there are couple of important changes in the new version of RDC which might affect your work. It is advised to first upgrade to the latest RDC version 6.1 and then upgrade to the new version 7.0. This makes sure that all the existing configuration and settings remain intact and you do not encounter any issues while upgrading. Below are the steps that can be followed to upgrade to the latest RDC version Step 1: Download the latest RDC version 6.1 from the link provided below: Step 2: Unzip the RDC file to a desired location. Step 3: Rename the unzipped RDC file with the name "setup.exe" Step 4: Run the setup file. It should take you through the wizard to configure the RDC. After configuration, a message appears saying that "RD Client (RDC) 7.0 is ready to be installed". Step 5: Click on the "Install now" button. Step 6: Follow on-screen instructions to complete the installation process. Step 7: After the installation is complete, start the RDC client by double-clicking on the shortcut in Start. You should now be able to connect to the RD server through RDC client. Step 8: To upgrade the RDC from the latest version 6.1 to the new version 7.0, double click on the shortcut and follow the wizard. Step 9: All 82157476af
